Port Of Tacoma
Request for Qualifications (RFQ) PA000000280
Parcel 40 Remedial Investigation, Feasibility Study, Cleanup Action
Plan and Engineering Design

A. PURPOSE

The Port of Tacoma (POT) is soliciting Statements of Qualifications (SOQ) from firms interested in providing environmental services and litigation support.

B. BACKGROUND

Created by Pierce County citizens in 1918, the Port of Tacoma is a major center for container cargo, bulk, break-bulk, autos and heavy-lift cargo. To learn more about the POT, visit www.portoftacoma.com.

Parcel 40 consists of an asphalt-paved lot with a 38,000 square foot maintenance garage (Building 600). The building foundation is slab-on-grade with a steel frame structure and sheet metal walls and roof. The building is leased to SSA Marine and is used to maintain marine terminal equipment. There is a paint booth on the west end of the building and a former underground storage tank system on the east side of the parcel, approximately 70 feet from the east end of Building 600.

True Oil Company constructed a 1.25 million gallon above-ground fuel storage tank in the 1930s which was removed in the early 1980s prior to the construction of a marine terminal. Petroleum has been documented in the subsurface during the closure of underground storage tanks and soil and groundwater investigations performed over time. Remedial activities include the removal of liquid petroleum hydrocarbon accumulations from monitoring wells and a sub-slab depressurization system beneath Building 600. The Port is currently negotiating an Agreed Order with the Washington Department of Ecology (Ecology) for the completion of a Remedial Investigation/Feasibility Study and Cleanup Action Plan. Relevant background information and the draft agreed order may be viewed on the Port of Tacoma website procurement listing (Attachment C's).

The Port anticipates awarding work in phases generally aligned with the major tasks listed in the draft agreed order (Exhibit B – scope of work and schedule). This will be followed by engineering design leading to the development of construction specifications for the preferred alternative described in the Cleanup Action Plan. The period of performance for the contract is three (3) years from the execution of the contract with an option to extend for two (2) additional one (1) year terms to provide related services as required.

The POT's Standard Terms and Conditions are included with the Sample Personal Services Agreement (Attachment B) to this RFQ. By submitting a SOQ, the Proposer represents that it has carefully read and agrees to be bound by the POT's Standard Terms and Conditions. Identify during the question submittal and response period, any sections you consider onerous, clarify why you consider these sections onerous, propose alternative language and describe why it is in the POT's best interests to adopt the alternative language.

ATTACHMENT A – INSTRUCTIONS FOR PROPOSING

SOQs submitted with altered or conditioned Terms and Conditions without prior written agreement from the POT will be considered non-responsive and not considered for evaluation.

Proposers submit SOQs understanding all contract terms and conditions are mandatory. Response submittal is agreement to the Contract without exception. The POT reserves the right to negotiate changes to submitted SOQs and to change the POT's otherwise mandatory Contract form during negotiations. If the Proposer is awarded a contract and refuses to sign the attached Contract form, the POT may reject the Proposer from this and future solicitations for the same work. Under no circumstances shall Proposer submit its own boilerplate of terms and conditions.
